

MODULAR
DIE SPRAYING TOOLS
PowerSpray

WOLLIN 

SYSTEMATIC SPRAYING TECHNOLOGY

THIS IS WHAT COUNTS!

- fast set-up times
- spot on separating agent application
- short spraying cycles
- improved casting quality
- lower reject rates
- lower separating agent consumption
- environmentally friendly
- All modules can be re-used

PowerSpray – DIE SPRAYING TOOLS MAKE SHORT WORK OF YOUR SPRAYING TIMES – WORLDWIDE.

OUR SERVICE ENSURES YOUR SUCCESS

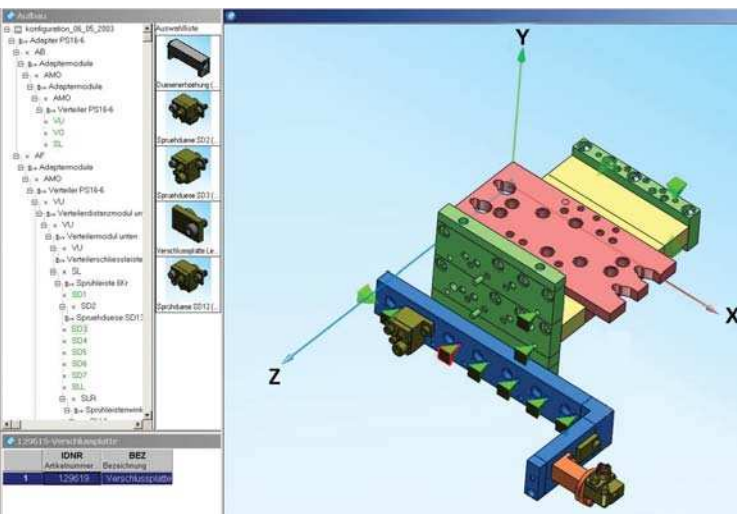

Individual die spraying tool design according to your needs – free of charge.

Using a model casting or the die drawing the die spraying tool is configured in next to no time on the computer.

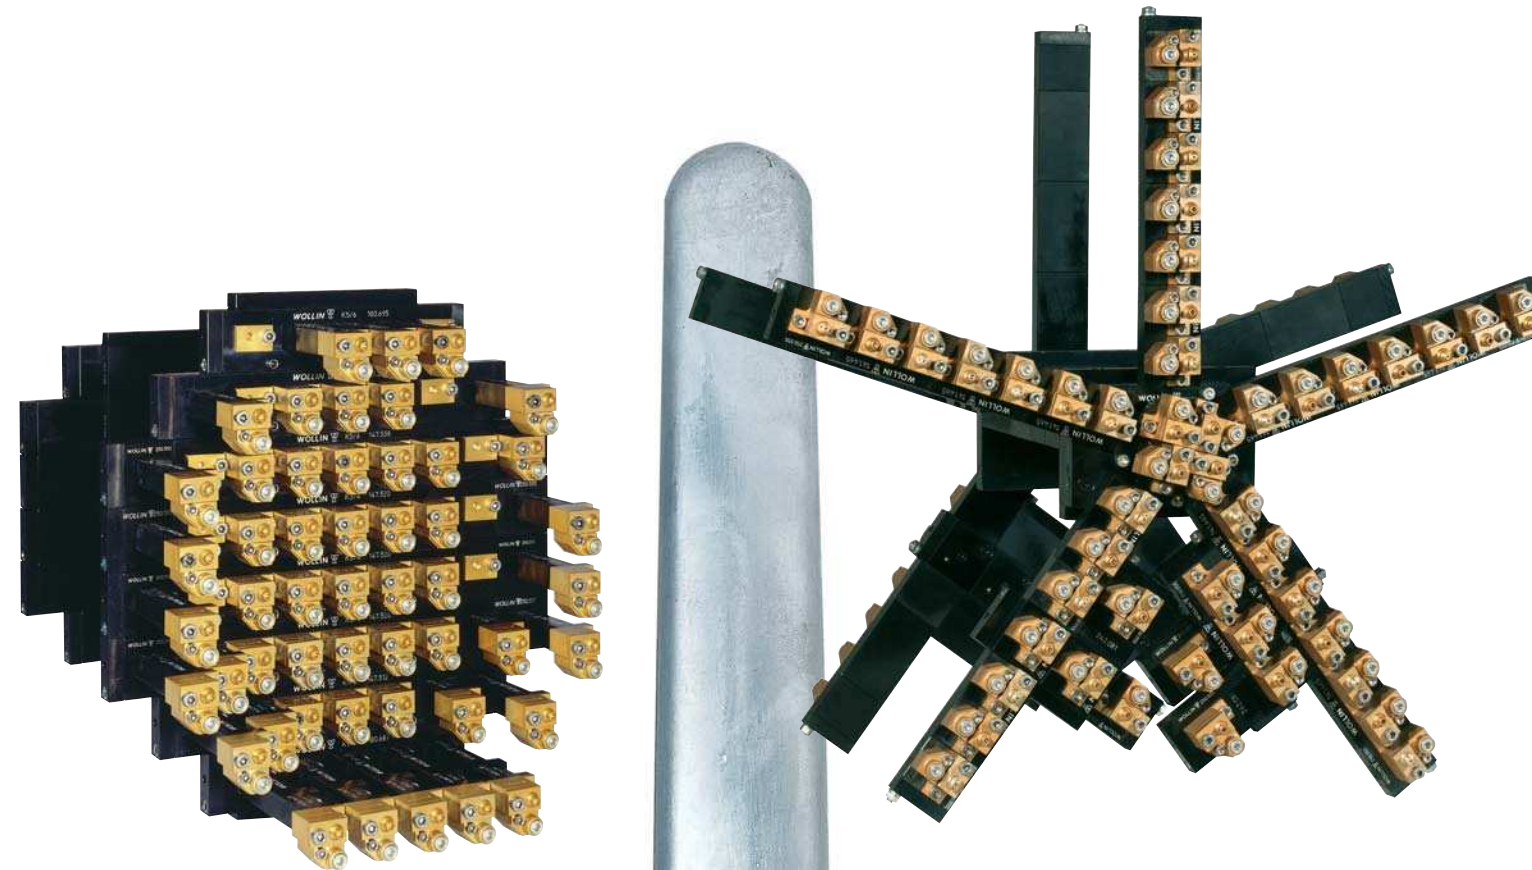

Assembly and delivery follow – no expensive special-purpose designs and long delivery times.

On special request our application technicians can run in the spraying tool in your production and so optimise the spraying process.

In this manner many of our customers were able to achieve considerable cost reduction while increasing production at the same time.

Computer-Design

WOLLIN – YOUR SOLUTION PROVIDER FOR THE DIE SPRAYING PROCESS

- **Simple assembly**
Modules for die width, height and depth in modular construction. Just insert, screw, adjust briefly and begin production! Fast changeover system and rapid archiving.
- **Flexibility**
The spraying strips or plates are freely configurable and that means assembly and adjustment in the shortest possible times whether for simple or complicated moulds – on the production site.
- **High performance**
High agent flow rates, mask spraying.
- **Process security**
Die specific adjustments are permanently fixed leading to high process security and reproducibility, no pipes.
- **Economical**
Due to the use of standard modules from the **PowerSpray** modular kits. All modules can be re-used.

The **PowerSpray** die spraying tool is patented.

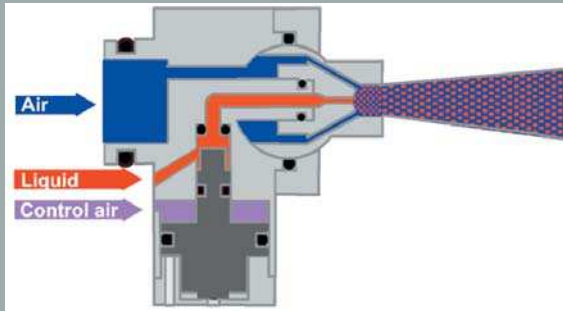

MODULAR DIE SPRAYING TOOLS *PowerSpray*

DIVERSE NOZZLE SHAPES FOR UNIVERSAL SPRAYING USE

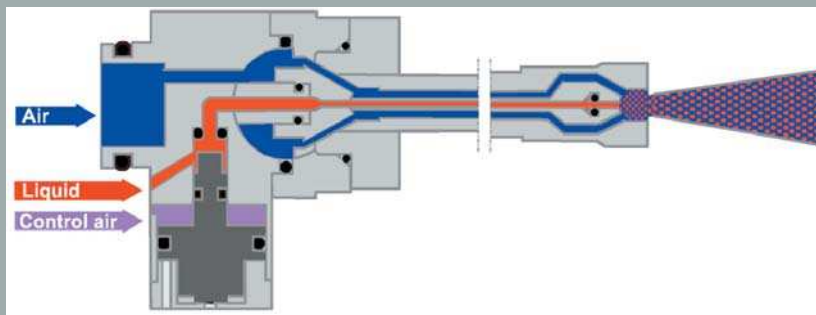

We offer sound advice and professional service – worldwide.

EXTERNAL MIXING SPRAYING NOZZLES SD 12/13

- External mixing spraying nozzle
- Microfine misting
- Low noise level
- Individual pressure adjustment
- Programmable flow rate with optional pressure control
